

CAUTION

Keep out of reach of children, pets, wildlife, and domestic animals.

Keep out of lakes, streams or ponds.

Wear rubber gloves when handling this product. If swallowed by human beings, domestic animals or pets, this material may reduce the clotting ability of the blood and cause bleeding. In such cases, intravenous and oral administration of vitamin K₁, combined with blood transfusions, is indicated as in the case of hemorrhage caused by overdoses of bishydroxycoumarin (Dicumarol).

IN ALL CASES OF HUMAN INGESTION IMMEDIATELY NOTIFY A PHYSICIAN.

STORAGE AND DISPOSAL

PROHIBITIONS: Do not contaminate water, food, or feed by storage or disposal.

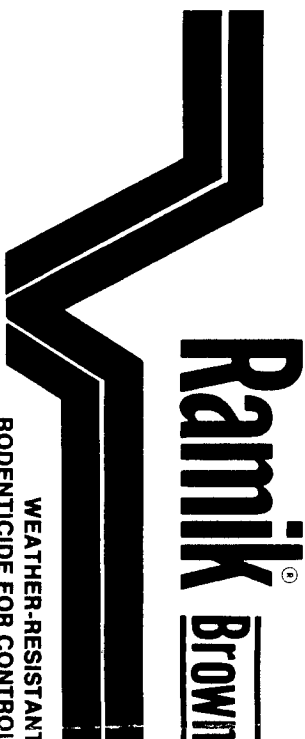

STORAGE: Store in original container in dry, cool area separately from fertilizer, feed, or foodstuffs and away from products with strong odors. Spillage should be carefully swept up and collected for disposal.

PESTICIDE DISPOSAL: Pesticide wastes may be toxic. Improper disposal of excess pesticide is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse plastic pails. For paper or plastic bags, or for fiber drums with liners, completely empty into application equipment by shaking and tapping container. Offer pails or drums for recycling or reconditioning or puncture before disposal. Dispose of bags, liners, or punctured containers in a sanitary landfill or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

NOTICE: Because Manufacturer and Seller have no control over storage, handling, and conditions of use, which are of critical importance, Manufacturer and Seller make no representation or warranty, either express or implied, for results due to misuse, improper handling or storage of this material. Nor do Manufacturer and Seller assume any responsibility for injury to persons, crops, animals, soil, or property arising out of misuse, improper handling, or storage of this material.

SUPPLEMENTAL LABELING

WEATHER-RESISTANT
RODENTICIDE FOR CONTROL
OF MEADOW VOLE IN
WHEAT & BARLEY

ACTIVE INGREDIENTS:

Diphacinone (2-Diphenylacetyl-1, 3-Indandione) 0.005%

INERT INGREDIENTS: 99.995%

Total 100.000%

CAUTION

KEEP OUT OF REACH OF CHILDREN

See left panel for additional cautions.

FOR USE IN THE STATE OF IDAHO

E.P.A. SLN No. ID-860018
E.P.A. Reg. No. 2393-497
EPA Est. No. 61282-WI-1

IMPORTANT: Before using this product read and carefully observe all applicable directions, restrictions and precautionary statements on the EPA-registered container label.

THIS LABELING MUST BE IN THE POSSESSION OF THE USER AT THE TIME OF PESTICIDE APPLICATION

24(c) Registrant:

Manufactured For:
HACO, inc.
P.O. Box 7190, Madison, WI 53707

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

PERIMETER TREATMENT OF AREAS SEEDED TO WHEAT & BARLEY

PEST	DIRECTIONS	LIMITATIONS
MEADOW VOLE	Place baits in tamper proof bait stations. Place baits 6-10 feet apart. At least 4 oz. of bait should be used per station. Continue baiting until all signs of feeding have stopped.	Apply as a field perimeter treatment in the non-seeded areas around fields seeded to small grains. All outdoor placements must be made in tamper proof boxes. Bait stations must be sturdy enough to resist destruction by coyotes and dogs. Bait compartments in stations must not be accessible to children or nontarget animals larger than voles. Bait stations used must be immobilized and secured to the ground unless their design does not allow bait to be shaken out of stations. Do not graze meat or dairy cattle in treated area. Do not cut hay from treated areas and feed or use for bedding. Do not feed grain, grain screenings, or straw from treated areas.

IMPORTANT

For best results, keep this product in a closed container, free from odors which may contaminate the bait and reduce acceptability. Rodents may feed several times before the effects are noticed. Several days may be required for death to occur.
